SUMMARY

I am a self-driven and skilled web developer with hands-on experience building personal and academic projects using modern front-end and back end technologies. I specialize in responsive web design, UI/UX, and full-stack development using tools like HTML, CSS, JavaScript, React.js, PHP, and MySQL. I have strong problem-solving skills, a creative mindset, and a keen eye for detail. Passionate about learning, building real-world applications, and growing as a professional developer.

OBJECTIVE

Motivated and self-taught web developer with strong front-end and back-end skills, passionate about building responsive and user-friendly websites. Eager to apply my technical knowledge, creativity, and problem-solving abilities in a professional environment. Seeking an opportunity to grow as a full-stack developer while contributing to meaningful, real-world projects.

 - Programming: Python, Java, Dart
 - Tools: Git, VS Code, XAMPP, phpMyAdmin
 - Project Tools: GitHub
 - Web Design & UI/UX
 - Design Thinking & Wireframing (Figma)
 - Strong Communication & Teamwork
-

PROJECTS

Personal Portfolio Website (completed)

Description:

Designed and developed a fully responsive personal portfolio website to showcase my skills, projects, and contact information. Integrated a custom contact form with PHP and MySQL to store user messages in the database. The site features dynamic project sections, smooth scrolling, and modern UI design. Built with clean code and optimized for performance across devices.

Project: Meal-Mate (Flutter Mobile App) (Completed)

Description:

Meal-Mate is a social meal-sharing mobile app built using Flutter. The app allows users to add, share, and view meals with photos and descriptions. Users can post their meals, explore others' shared dishes, and interact through a clean and user-friendly interface. The project focuses on real-time data handling, state management, and responsive mobile design for both Android and iOS.

Project: Plant Nursery Website (completed)

Description:

Developed a dynamic Plant Nursery website that allows users to browse, filter, and purchase plants online. The site includes a user-friendly product catalog, shopping cart, order management system, and secure user authentication. Admin panel enables easy management of products, categories, and orders. Designed with responsive layout and clean UI for an engaging user experience across all devices.

Project: Personalized Fitness App (In Process)

Technologies: Flutter, Dart, Firebase/Supabase, Flutter Charts, Camera & Pose Detection (in progress)

Description:

Designed and developed a cross-platform fitness app using Flutter, focused on delivering a personalized health and workout experience. The app includes features like workout routines, meal plans, nutrition tracking, calorie calculator, exercise library, progress tracking charts, and user profile management. Currently integrating pose detection to analyze and improve user posture during workouts. Built with an engaging UI, smooth navigation, and scalable architecture for future expansion.
